

## Testimonial

*"Certis' improvement methodology & on-boarding processes dived deep into the root cause of real problems while working closely with leadership, technical communities, IT and our head corporate offices. This holistic approach was instrumental to designing and implementing a long-term & sustainable TDRM (Technical Documents and Records Management) integrated solution, where people, technology & processes work in synergy. Certis delivers"*

## QUANTIFIABLE VALUE

75%

INCREASE IN RESERVOIR ENGINEERS' EFFICIENCY IN SELECTED TASKS.

60%

REDUCTION IN CYCLE-TIME FROM ORDER TO INSTALLATION

30%

INCREASE IN PRODUCTION ENGINEERS' WELL FAILURE ANALYSES TIME

10%

REDUCTION IN FIELD-CREW DOWN-TIME (NPT) ON SELECTED TASKS.

## Process Services

Process & workflow assessment

Failure, risk, efficiency and root cause analysis

New or improved process design

Gap analysis, action and control plan

Implementation

Change Management

CERTIS' METHODOLOGY IS SIMPLE YET POWERFUL.

*"Certis completes process and workflow projects more efficiently and cost effectively than ANY other alternative. We continue to implement the solutions and get better."*

*From a large Independent.*

## SOME PROCESS PROJECTS DELIVERED

- Well failure tracking
- Well model tuning and test validation
- HCorizonral well frac. design optimization
- Well workover analysis and review
- Joint Venture data provision
- Technical documents management (TDRM)
- Seismic data services
- Static Bottom Hole Pressure (SBHP) capture
- Well potential management
- Production allocation
- Production forecasting standardization-n
- Unconventional fields mud cuttings analysis
- Frac. sweet-spot identification
- Well test planning and prioritization
- Integrated surface & subsurface modeling
